

Calibration Error: Cirrus Band

❖ *Dominica: 2013May05_Cirrus*

Enhance: [Scroll] Equalization

The red box indicates a clear example of the calibration error in the cirrus band.

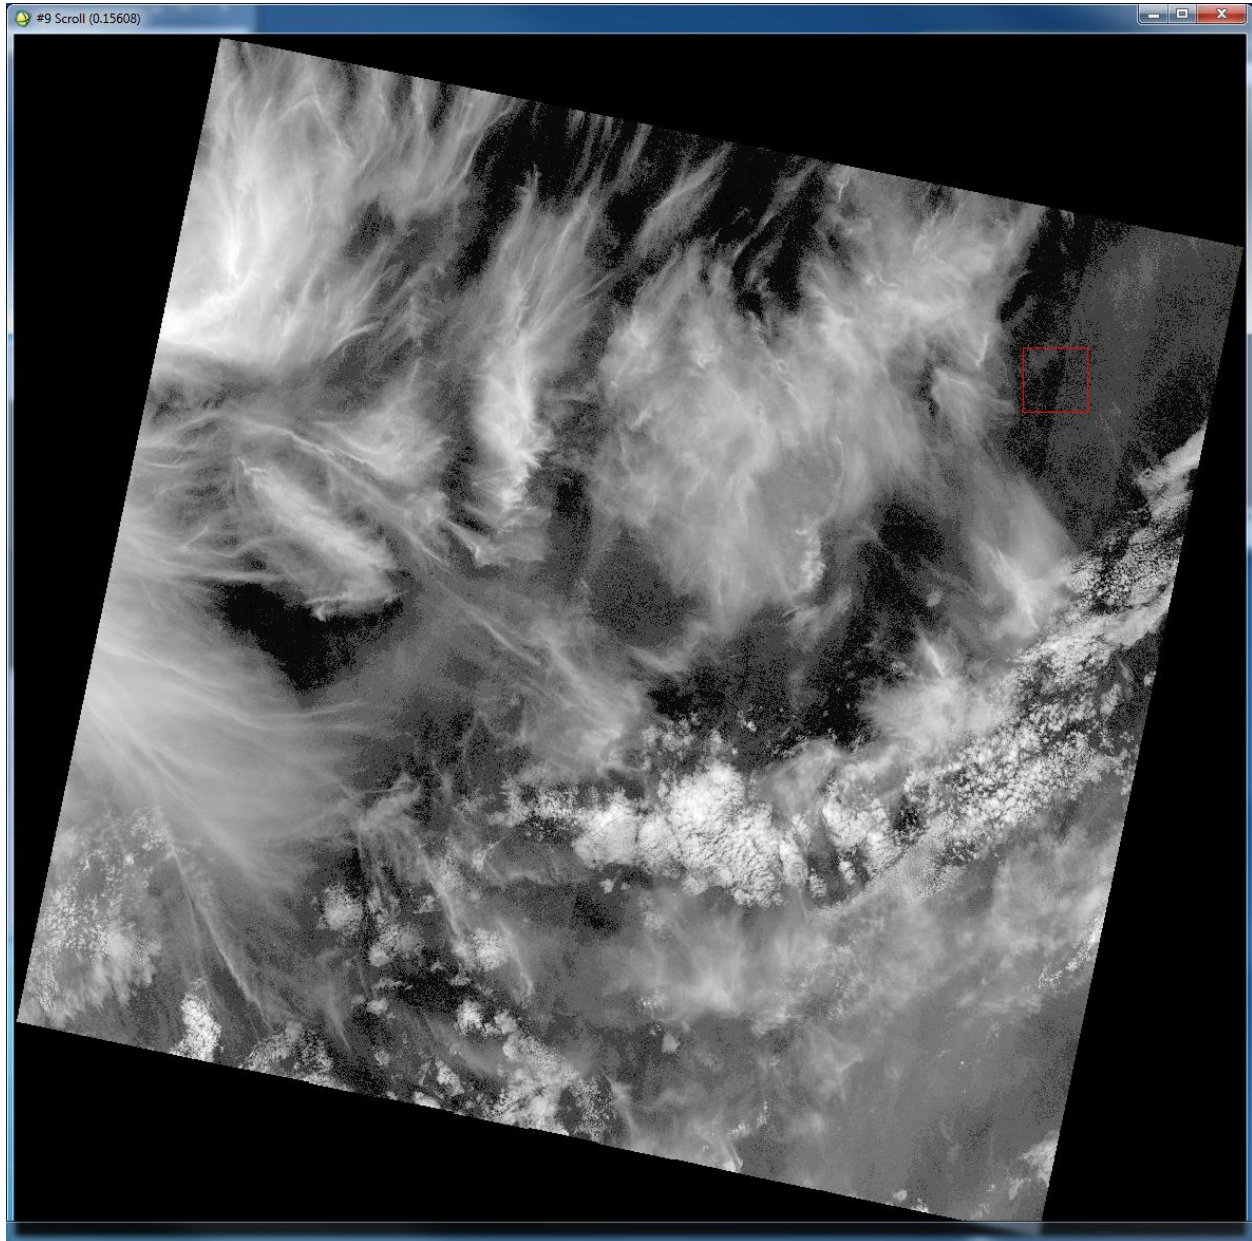

The values across this “boundary” differ no more than by 10-15 units in the DN values.
Ex.: 5052 – 5062

The “boundary” is also not exaggerated by the conversion to the TOA reflectance values. The image below is that of the cirrus band after conversion to reflectance values

❖ *Dominica: 2013May05_Cirrus_TOA*

This calibration error is detectable in other scenes:

❖ *Mississippi: 2013May24_Cirrus*
